INTRODUCTION

This report illustrates the composition of the Manitoba economy in terms of the number of establishments. For an explanation of the term "establishment" please see the Definitions section below.

The number of establishments are presented in the following manner:

by industry sector and region: January 1992
by employment size and region: January 1992
by industry sector and employment size: January 1992

DEFINITIONS

Establishment - The smallest unit of a company (whether sole proprietorship, partnership, co-operative, corporation, etc) that is a separate operating entity capable of reporting all elements of basic industrial statistics. Revenue Canada payroll deduction accounts are the base data source for the compilation of establishments.

Establishments are assigned to an industry sector according to the 1980 Standard Industrial Classification (1980 SIC), based on their major industrial activity.

In this report the industry sector "Business, Education, Health, Accommodation and Other Services" (sic 7710 to 7799, 8511 to 9999) will be referred to as "Services".

The tables cover all industrial activity in Manitoba but are limited to the employer portion of the business world. Therefore, a business such as a corner store that is owner/operated, with no paid employees, would be excluded from these counts.

Employment Size - Codes give a range of employees only. Exact number of employees are not released.
